CLOSING REPORT

IPB 2010 – Three days with good results

- **6.100 high-level visitors and congress participants**
- **Successful parallel supporting programme**

This year's International Powder/Bulk Conference & Exhibition (IPB), held from 27 to 29 September in Shanghai, was the scene of a lot of optimism and high-quality discussions. The trade fair closed after three days with good results: Considerably more exhibitors (2010: 147; 2009: 129) and high-level visitors than last year (2010: 6.100; 2009: 5.200). This proves that IPB is the largest and most specialised international trade fair in the whole field of powder, granule and bulk solids technology in China. The trade fair is organised jointly by the Chinese Society of Particuology (CSP), NürnbergMesse China Co., Ltd. and Worldwide Exhibitions Service Co., Ltd. with strong support from POWTECH of Nuremberg, Germany.

Over the past eight years, with full support and joint efforts contributed by all organizers, exhibitors and visitors, the event has grown up year by year in both scale and influence. "It's a great delight for all participants and NürnbergMesse China Co. to build up a bridge for exchanging information between engineering, technician and research personnel, between producers and customers in the powder and bulk industry", assumes Evian Gu, Project Manager of the IPB. Over 6.100 trade visitors and congress participants used the IPB 2010 as the platform to meet leading manufacturers and find new applications for their manufacturing processes. The 147 exhibitors came to Shanghai from eight countries: China, Germany, the UK, Italy, the Netherlands, the Czech Republic, Japan and Singapore. The visitors made their way to Shanghai from 17 countries: China, Pakistan, Germany, Russia, Ecuador, France, Korea, the Netherlands, Malaysia, the USA, Japan, Thailand, Singapore, India, Indonesia, the UK and Vietnam.

The international event offered a unique opportunity to gather firsthand information on the latest technologies within the whole field of powder, granule and bulk solids in China. The remarkable development of the show is based on an exhibition with well-known key players from the industry and a high-calibre conference programme with top-speakers.

The Highlights of 2010

The leading powder and bulk companies presented the latest technology and products on the show, including well known names such as: EIRICH, GE Energy, Hosokawa, Keller Lufttechnik, Malvern Instruments, Matcon, NETZSCH, PIAB, Steute Schaltgeräte, Sympatec and many others. For the second time already the exhibitors of POWTECH got the offer to attend IPB 2010 under special conditions, with great results: the area of the POWTECH-Pavilion encompassed 210 square meters. The Japanese pavilion organized by The Association of Powder Process Industry and Engineering (APPIE), Japan, showed the advanced powder and bulk technology including workshop on-site on 28th September. All flanked by a specific conference program focused on numerous applications of the powder and bulk technology.

Note the date: The next IPB takes place in Shanghai from 27-29 September 2011, at the Shanghai International Exhibition Centre.

IPB is part of the POWDER & BULK NETWORK, a successful concentration of events in this field. It is based on POWTECH, the International Trade Fair for Mechanical Processing Technologies and Instrumentation in Nuremberg, Germany, which is the established leading exhibition on related topics. Together with BulkSolids India in Mumbai, India, and BulkSolids Europe and the World Congress on Particle Technology (WCPT) the NETWORK spans over the whole world, which covers all the key world markets concerned.
