PRESS RELEASE

TechnoPharm 2010: The world of life science process technologies

◆ Attractive supporting programme taking shape

TechnoPharm takes place in the Exhibition Centre Nuremberg from 27-29 April 2010. This exhibition is the expert information forum for cleanroom technology, analysis and packaging technology for the production of pharmaceuticals, food, cosmetics, dietary products and health foods in Europe. The some 300 exhibitors at the last event showed the industries the latest developments and discussed current trends with specialists from research, development, cleanroom and GMP production, and analysis. TechnoPharm takes place in combination with the international exhibition POWTECH (mechanical processing technologies and instrumentation) and parallel to WCPT6, the World Congress on Particle Technology.

TechnoPharm has been the only specialist European exhibition for cleanroom technology, analysis and packaging technology for the production of pharmaceuticals, food, cosmetics, dietary products and health foods for many years. With its concentration on life science process technologies, TechnoPharm offers a compact information forum for all the leading manufacturers of hygiene process components and the operators of cleanroom plants. This exhibition shows the exceptionally high innovation potential of these industries. With a comprehensive spectrum of products and services in the exhibition halls and many special shows and presentation lectures as training platforms, TechnoPharm provides the necessary information lead and the inspiration to create major competitive advantages again in 2010.

Internationale Fachmesse für Life Science Prozesstechnologien Pharma – Food – Cosmetics
International Trade Fair for Life Science Process Technologies Pharma – Food – Cosmetics

The range of products covers source materials, production plant and equipment, filling and packing, cleaning, hygiene, environment monitoring, environment, industrial safety, disposal, quality assurance and services. The exhibitors and visitors at TechnoPharm 2008 confirmed the importance of the exhibition: 88 per cent of the 302 exhibitors were satisfied with the overall success of their exhibiting activities.

The exhibitors welcomed mainly customers from the industry to their stands (81 %), followed by consultant planners and engineers (36 %), service companies (11 %), and colleges and universities. One in three of the more than 15,000 trade visitors at the TechnoPharm/POWTECH exhibition duo currently comes from abroad. The visitors are mainly general managers, works managers, technical managers, purchasing managers and their staff from the pharmaceutical, chemical, food, cosmetic, machinery and plant engineering or electronic industries.

Attractive supporting programme at TechnoPharm 2010*

There will be a two-day symposium again in 2010, organized by the magazines “CHEMIE TECHNIK / Pharma+Food” from Hüthig Verlag together with the International Association for Pharmaceutical Technology (APV). The symposium will focus on “The future of process control”.

APV as consultant partner of TechnoPharm is organizing other seminars and events parallel to the exhibition. These include “Tablet compaction training” and the seminars “Ways to success: Plant engineering and test sample production for biotechnology companies” and “Efficient use of complexity management”. The latter will particularly examine the reduction of the degree of complexity and complexity costs and the redesign of the pharma supply chain. An APV seminar also tackles the “Requirements of personnel in key positions”. This seminar focuses on experiences in everyday work and the participants receive a realistic description of how other managers have already organized their work. The speakers report on their work and explain tasks, responsibilities, delegations and interfaces.

The detailed contents will be published soon at: www.apv-mainz.de.

* Subject to change. As of October 2009

Internationale Fachmesse für Life Science Prozesstechnologien Pharma – Food – Cosmetics
International Trade Fair for Life Science Process Technologies Pharma – Food – Cosmetics

Visitors can look forward to interesting and topical lectures at the Exhibitor Forum at the heart of the halls again next year. Admission is free. The full programme will be available soon at **www.technopharm.de**.

Next year there will also be a separate area for packaging and labelling in hall 1, where specialist exhibitors present their products at a special show supported by the magazines “CHEMIE TECHNIK / Pharma+Food” from Hüthig Verlag. Visitors can see a working process chain for package security at the same time.
