

CLOSING REPORT

Nov.2016

IPB 2016 Achieved Complete Success

•Trade visitors are up by 11% to last year. Nearly 84% exhibitors are satisfied with the quality of the visitors and looking forward to IPB2017.

•Highlights – 2016 InnoPowder & Bulk Solids Corner

•Accompanying Programs - 2016 Shanghai International Pharmaceutical Powder Particle Processing Seminar attracted hundreds of new visitors from the pharmaceutical manufacturing industry

•2016 IND EX[®] Safety Symposium was held successfully - World Well-known Explosion Prevention Experts gathered at IPB

IPB 2016 came to a successful end last month from 19 October to 21 October, 2016. IPB has witnessed cultivation history of Chinese powder and bulk solids processing industry for more than ten years, annually held in Shanghai as an industry benchmarking grand meeting, which has been permeating upstream-downstream industries and covering broader fields. In IPB 2016, nearly 200 exhibitors from 14 countries in the fields of crushing, grinding, screening, drying, mixing, filtering, conveying, packing, testing, safety explosion prevention etc. gathered in up to 6,500 square meters venue, with 7,988 trade visitors. IPB will move to the new venue next year and it will be held from 16 to 18 October 2017.

7,988 trade visitors visited IPB2016 in the three-day exhibition and the increasing rate is up by 11% to last year. The main purpose for visitors is to research marketing information and onsite purchasement. According to the result of visitor survey, the majority visitors are from chemical sector (34%), followed by medical sector (13%), food and feed (13%), energy (9%), ceramics & glass (8%), pit and quarry (7%), metallurgy (5%), and tobacco (3%) ect.. Still, processing technologies and planting engineering technologies interest visitors most, and the next is safety and environmental technologies, and nano particle development and innovation. The updated investigation shows that 84% exhibitors successfully negotiate with important clients during exhibiting period, and 93% exhibitors are satisfied with their booth

Highlights – 2016 InnoPowder& Bulk Solids Corner

The first edition of 2016 InnoPowder& Bulk Solids Corner was held successfully during the event. It is an onsite stage/showroom inside the venue and 8 exhibitors

are selected as leading powder suppliers to present their products for 2016 professional visitors. This corner was absolutely become one of the most attractive parts of IPB 2016, which increased the adhesiveness for exhibitors and visitors.

Accompanying Programs - 2016 Shanghai International Pharmaceutical Powder Particle Processing Seminar attracted hundreds of new visitors from the pharmaceutical manufacturing industry

2016 Shanghai International Pharmaceutical Powder Particle Processing Seminar is the first edition of seminar related to pharmaceutical industry in the history of the IPB's exhibitions. It has attracted hundreds of new visitors in the pharmaceutical industry. It is co-organized by NürnbergMesse China and IPB media partner 360 Powder. During the seminar, the president of the International Association for Pharmaceutical Technology (APV) Dr. Martin Bornhöft gave a prospective speech for the first time about the Continuous Manufacturing of Solid Dosage Forms, which had highly recognized by audiences. Moreover, Dr. Jenny Geng from Sympatec GmbH System-Partikel-Technik also made a wonderful report on interpretation of USP Regulation for Laser Diffraction Particle Size, and she also analysed the significance for the pharmaceutical enterprises.

2016 IND EX® Safety Symposium was held successfully

Furthermore, as one of the important activities of this exhibition, 2016 IND EX® Safety Symposium was held on 20th of October. The organizers gather together the explosion-proof safety experts all over the world and make detailed report on the world's most advanced industrial explosion-proof solutions and safety concepts.

It is worth mentioning that the expert Mr. Richard Siwek from Switzerland gives in-depth speech about how to avoid dangerous conditions from various explosion prevention methods. The Symposium has intrigued the audience. They present thoughts and ideas freely with interaction.

IPB 2016 exhibition which has lasted for three days and becomes an event for trade negotiations and technical exchanges for upstream and downstream enterprises in the powder industry chain. IPB event welcomes experts from all over the world who specialize in powder & bulk solids processing field to visit the exhibition.

More information about the event and the programme of the accompanying conference will shortly be available from: www.ipbexpo.com
